

TutorME “ Beyond the classroom...”

By **Oakwood Education** brings you a state-of-the-art training aid that will ensure the identification, attraction and retention of profitable customers.

How can you build on the base of classroom training?

How can you by-pass the cost of another general course?

How can you avoid employees being absent from work to attend courses?

How can you ensure that training will meet your specific needs?

How can you turn theory into practice more quickly?

How can you do all this for a modest cost?

The answer is TutorME.

TutorME is an on-site application designed to reinforce instructor-led training.

TutorME is designed around your business needs and focuses on your specific business applications.

TutorME is an application that is available in the workplace, either on CD-ROM or installed on a hard drive.

TutorME ensures that sales and service personnel do not have to leave the work place for training.

TutorME is low cost/high benefit option.

TutorME gives a quicker return on investment.

Key features of TutorME

- Simple to Use
TutorME features a streamline point-and-click flow of clear, concise learning information... directly to the user for the user.
- Complete Tutorials
Coherent demonstrations are the backbone of the **TutorME** learning method. Learning optimizes...retention increases.
- A Focused Approach
The tailored application is linked to the learning objectives and competencies determined by your organization.
- Easy of Availability and Connectivity
Modules or the entire programme can be run off the main server or a laptop. Ideal for remote office users who need immediate answers to their questions.
- Customized for Your Business
TutorME can be customized for each client or you can use our generic processes. Step by Step text and screen based with multi-lingual commentary means it's like having your own instructor on your staff, full time.
- Features at your fingertips
TutorME has all the look and functionality of the Oracle Applications built into it without having to be connected.
- It reinforces business application learning by simulating key business flows and providing linkages to tutorials and online help. End-user questions answered quickly and concisely.

Oakwood Education is in the business of matching Education to the Business Process. We specialise in end-user training for Oracle Applications. We use professional trainers to deliver our services. Materials and labs are custom designed to tie in to your business processes. You will have a unique set of materials for your exclusive use. Speed of delivery is one of our competitive advantages.
